|----------------------|--|-----------------------|
| About me             | A theoretical physics student at ICTP. Aspiring to contribute towards a concrete formulation of Quantum Field Theory (QFT), the basic language to describe a large variety of physical systems.  |                       |
| Education            | <b>ICTP Post-Graduate Diploma Program</b>  | Sep. 2025 - Present   |
|                      | <i>Abdus Salam International Centre for Theoretical Physics (ICTP), Trieste, Italy</i>   |                       |
|                      | <ul style="list-style-type: none"><li>Thesis topic: Aspects of conformal defects in <math>O(N)</math> models</li><li>Supervisor: Dr. Gabriel Cuomo (SISSA) (<a href="#">academic webpage</a>)</li></ul>  |                       |
|                      | <b>Bachelor of Science in Physics</b> (GPA: 3.65/4.0)  | Aug. 2021 - Jun. 2025 |
|                      | <i>Middle East Technical University (METU), Ankara, Turkey</i>   |                       |
|                      | <ul style="list-style-type: none"><li>Thesis: Bootstrapping non-invertible symmetries (<a href="#">poster &amp; slides</a>)</li></ul>  |                       |
| Publications         | <b>Oğuz, B.</b> , Topological Manipulations On $\mathbb{R}$ Symmetries Of Abelian Gauge Theory. ( <i>accepted to JHEP</i> ), [ <a href="#">2505.03700</a> ]  |                       |
|                      | <b>Oğuz, B.</b> , and Tekin, B. Some lower dimensional quantum field theories reduced from Chern-Simons gauge theories. <i>Phys. Rev. D</i> , <b>110</b> (2024) 085019 [ <a href="#">2405.09473</a> ]  |                       |
| Research Experiences | <b>Topological Aspects of Non-Compact Gauge Theories</b>   | Jan. 2025 – Oct. 2025 |
|                      | Independent work   |                       |
|                      | <ul style="list-style-type: none"><li>Contributed to the study of topological manipulations on non-compact symmetries, building on recent developments concerning non-compact TQFTs.</li><li>Bridged the SymTFT results in the literature with local TQFT couplings, and explored novel manipulations and topological defects.</li></ul>               |                       |
|                      | <b>2d Adjoint Quantum Chromodynamics (QCD)</b>   | Jun. 2025 - Aug. 2025 |
|                      | Supervisor: Prof. Mithat Ünsal (NCSU)  |                       |
|                      | <ul style="list-style-type: none"><li>Through the lens of non-abelian bosonization, studied the dynamics and non-invertible symmetries of 2d QCD with adjoint fermionic matter fields.</li></ul>   |                       |
|                      | <b>Research Group on Gauge/Gravity Theories</b>  | July 2023 – Dec. 2024 |
|                      | Mentor: Prof. Bayram Tekin (METU)  |                       |
|                      | <ul style="list-style-type: none"><li>Contributed to the dimensional reduction of Chern-Simons theory and 3d gravity.</li></ul>  |                       |
|                      | <b>Quantum Theories of Fields, Matter, and Strings</b>   | Apr. 2025 - Present   |
|                      | <ul style="list-style-type: none"><li>Founder and organizer of an online seminar series on theoretical physics, run independently by a group of students in Turkey (<a href="#">QTFMS</a>), with a reach of thousands of people across the globe.</li><li>Hosted 10+ research seminars by excellent researchers over the course of 6 months.</li></ul> |                       |
| Organizational Work  |  |                       |
